

Combine  
your love of  
**science**  
and the arts

## Bachelor of Arts / Bachelor of Science

A combined arts and science degree provides you with a strong scientific base and powerful communication talents, allowing you to explain scientific principles to a broad audience. Tailor your degree to suit your interests while earning two degrees in four years instead of six.

You can choose from more than 20 specialisations in a wide range of areas including humanities, social sciences and science. Combine your interests in community work and public health, environment and heritage and environmental science, and many more. Build your scientific knowledge with strong communication and critical thinking skills.

In this program you will:

- Develop a niche skill set for a career you're interested in.
- Learn how to communicate scientific language to a broad audience.
- Make industry contacts through hands-on work experience.
- Choose from a wide range of career options when you graduate.

### Majors

**Arts majors:** A broad range of arts majors are available from disciplines in social sciences, communication and languages. Please refer to Program Structure.

**Science and health majors:** Biology; Biotechnology; Chemistry; Ecology; Food and Biosecurity; Mathematics.
