The Bachelor of Animal Ecology/Bachelor of Business (Tourism, Leisure and Event Management) is a hands-on, industry oriented four-year program, aimed at training specialist animal ecologists and tourism managers who are skilled in maintaining and enhancing environmental integrity. You will learn how animals are impacted by the environment and human interaction and what we can do to protect their future. You will develop your analytical, management and research skills to better understand how to conserve animals, and how to engage with stakeholders in the scientific, public and business sectors. You will also learn how to assess the sustainability-related impacts of tourism, and how this links with animal conservation, biodiversity and animal behaviour. You will apply your growing knowledge and skills through fieldwork in locations such as Fraser Island and Stradbroke Island, and through industry projects designed to develop a solid foundation for your chosen career.

Career opportunities
Graduates of this degree will be trained to work as environmental consultants, wildlife managers, collectors and curators in museums, specialist environmental educators, ecotourism guides, within policy think-tanks, policy and planning, environment/visitor management, conservation NGO’s, marketing, research organisations and public education.

Membership

Scholarships
Scholarships can give you money and other financial support to help you while you study. Find out more at usc.edu.au/scholarships.

LOCATION
Sunshine Coast
QTAC CODE
013271
MINIMUM SELECTION THRESHOLD
ATAR - 54.55 / OP - 18 / Rank - 64
DURATION
4 years full time or equivalent part time
COMMENCE
Semester 1, Semester 2
RECOMMENDED PRIOR STUDY
English; General Maths, Maths Methods or Specialist Maths and at least one science subject
