

Combine  
your love of  
**science**  
and the arts

## Bachelor of Arts / Bachelor of Science

A combined arts and science degree provides you with a strong scientific base and powerful communication talents. Choose from more than 20 specialisations in a wide range of areas including humanities, social sciences and science with the flexibility to tailor your own studies.

This degree is designed to build your scientific knowledge coupled with strong communication and critical thinking skills. When you graduate, you'll have diverse career choices in research institutes, planning agencies, public relations and management in industries related to technology, production and the environment.

In this program you will:

- Choose from a wide range of major and minors that spark your interests and ambitions - for example, combine your interests in community work and public health, environment and heritage and environmental science, and many more
- Earn two degrees in areas you're passionate about
- Develop a niche skill set that sets you apart from other graduates
- Gain work experience and make industry contacts through work-integrated learning courses

### Majors

Arts majors: A broad range of arts majors are available from disciplines in social sciences, communication and languages. Please refer to Program Structure.
