START

Session 2, Session 5, Session 6

The Master in Health Promotion is designed for professionals interested in a career in health promotion or wanting to develop deeper practice or research knowledge and skills in health promotion to complement their current roles.

In this program you will:

- Learn how to assess health and wellbeing needs of communities and priority population groups
- Plan, implement, and evaluate effective evidence-based health promotion programs to address a range of health equity priorities
- Utilise critical health promotion values and principles to plan and advocate for health equity and social justice outcomes
- Develop research knowledge and skills to understand and address contemporary health priorities
- Learn from leading academics and practitioners using practical and relevant workplace scenarios
