Master of Science

Upgrade your original training and develop new or existing areas of expertise. The practical focus of this higher degree by research is designed to increase your professional credibility in day-to-day dealings with clients and equip you for senior positions. Undertake a comprehensive review of research literature, learn advanced research techniques, and apply extensive analysis to a project in the workplace.

Research areas:

You can choose from recognised research concentrations:

- GeneCology Research Centre
- Cluster for Health Improvement
- Inflammation and Healing Research Cluster

You can also access opportunities with the Australian Institute of Fitness Research. If environmental issues are your specialty, consider collaborating with USC staff involved in a number of educational and research projects that focus on climate change adaptation. Research is a major focus in the School of Health and Sport Sciences.

Admission requirements

To be eligible for admission to Master of Science candidature, applicants are normally required to hold a bachelors degree with at least Honours Class 2 Division II from a recognised higher education institution. Applicants who have completed a bachelors degree and have achieved by subsequent work and study a standard equivalent to at least

Honours Class 2 Division II may also be considered.

Entry by non-graduates who have relevant governmental or industry experience may be considered on a case-by-case basis.

In exceptional cases applications may be considered on the basis of other evidence of general and professional qualifications as approved by the Research Degrees Committee. Refer also to the University's English language requirements.

Admission is subject to availability of appropriate supervision and facilities.

PROGRAM STRUCTURE

As a candidate you are required to conduct research that can be written up as a scholarly thesis.

You must demonstrate research competency and the ability to make a significant and original contribution to the body of knowledge in your chosen area of specialisation.

You must clearly articulate in your research outline, the topic, background, rationale, research question, aim and objectives, methodology, research methods and techniques, and timeframe.

Your research outline is to include a literature review that relates to the research question and objectives. The results of your research activities should be presented succinctly and accurately and as necessary could be supported by more detailed annexures.

Your syntheses analysis and discussion must clearly focus on the research question and the objectives of the work.

Conclusions and recommendations must be drawn from your analysis and discussion and reflect the attainment of the aim and the way in which the research question is addressed.
